Information Architecture

Master's Student and User Experience & User Interface Designer specializing in iOS application design, artificial intelligence powered UX research, and game UI/UX design. Experienced in building extensive design systems, performing usability tests, and providing user-centric digital solutions. Interested in accessibility, visual communication, and user engagement.

[experience]

OCT 2023 – FEB 2026	UX/UI Design BGnet Mobile UX/UI Designer
----------------------------	---

Product & System Design: Created over 8 iOS apps and developed scalable design systems (UI components, typography, color theory) from scratch.

UX Strategy & Research: Increased functionality of the apps by conducting over 30 usability audits, creating over 20 user journey maps, and developing user personas based on data.

Cross-Functional Execution: Closely worked with developers for accurate hand-offs and produced social media assets for marketing purposes.

JULY 2023 – SEPT 2026	UX/UI Design Crafton Agencja Interaktywna UX/UI Designer Intern
------------------------------	--

Led comprehensive web analyses using heuristics and Google Analytics to optimize user workflows. Developed wireframes and interactive prototypes, effectively identifying and resolving critical usability pain points through direct user testing sessions.

NOV 2021 – JUNE 2022	Graphic Design Yildiz Technical University Working Student
-----------------------------	---

Developed a comprehensive map of the school that would help in tracing the movement of the buses as well as improving the general aesthetic look through improving project images using Adobe Photoshop.

[education]
